

# **ECONOMICS 341H1F**

## **THE ECONOMIC HISTORY OF THE TWENTIETH CENTURY: TRADE, MIGRATION, MONEY, AND FINANCE**

University of Toronto  
Department of Economics  
2020

### **Course Information**

Instructor: Professor J. Cohen

Email: [jon.cohen@utoronto.ca](mailto:jon.cohen@utoronto.ca)

Course website: <https://q.utoronto.ca/>

Course Lectures: Tuesday 10-12, Live Streamed and Recorded

Tutorial (as required): Wednesday 10-11, Live Streamed, and Recorded

Office hours: Wednesday 3:00-5:00pm on-line via Face Time or the equivalent, by appointment.

### **Prerequisites**

ECO200Y/204Y/206Y/(ECO230Y, POL208Y). Please note: the department checks prerequisites. Students who have not taken the necessary prerequisites will not be allowed to take the course.

### **Course Goals**

This course is designed for third and fourth year specialist students, especially those in economics, commerce, international relations and history. The focus is on growth and fluctuations in Europe and North America between roughly 1870 and 1939, with emphasis on international trade and payments, migration, investment, and monetary arrangements.

### **Coursework, Assignments and The Marking Scheme (In the Time of Covid)**

As you all know, the university has put in place strict health and safety guidelines to help keep us all well. For ECO341H, this means that students this year will follow the lectures (and participate in the tutorials) in one of three, not necessarily mutually exclusive ways – in person, live streamed, and/or recorded. Moreover, traditional in

person final exams will not be given in the fall term. The assignments and evaluation schemes must, therefore, accommodate a variety of participation methods and exam restrictions. I explain below how I plan to proceed.

### **Tests:**

There will be **five** ‘take-home’ tests, each worth 5 points. (**SEE SYLLABUS FOR DATES AND COVERAGE OF EACH TEST.**) They will be administered as follows. On the day of the test, the question (no choice) will be posted on the course web site at 9 AM Toronto time. **Answers, based on starred readings and material presented in the lectures, not to exceed 500 words must be submitted online by 11:59 PM of the same day.** Grades will be posted as soon as possible on the course web site.

Although the tests can be thought of as relatively low stakes writing assignments, they will help you synthesize course material, hone your writing skills, and learn something about the economic history of the 20<sup>th</sup> century.

### **Short Essays:**

There will be **three short essays (maximum five double spaced pages, not including tables, figures, bibliography, and end notes)**, each worth 25 percent of your final mark. Due dates and a restricted set of topics (you must choose one from those listed) are included at the end of the Syllabus under the heading **The Essays**. I also describe the grading scheme that will be used to evaluate your efforts.

To summarize, your final grade in the course will be based on the following marking scheme:

FIVE TESTS	5% (EACH)
THREE ESSAYS	25% (EACH)

### **Marking and Appeals**

Grades in this course will follow the Faculty's guidelines as outlined in the Calendar, which can be found here:

[http://www.artsandscience.utoronto.ca/ofr/calendar/Rules\\_&\\_Regulations.html#grading](http://www.artsandscience.utoronto.ca/ofr/calendar/Rules_&_Regulations.html#grading)

Disputes over the evaluation of a piece of work should first be submitted to Professor Cohen in writing within two weeks of receiving the grade on the disputed piece of work. If, following consultation with Professor Cohen and/or the TA, the matter remains unresolved, students should follow the procedure for pedagogical appeals found here: [http://www.artsandscience.utoronto.ca/ofr/calendar/Rules\\_&\\_Regulations.html#appeals\\_petitions](http://www.artsandscience.utoronto.ca/ofr/calendar/Rules_&_Regulations.html#appeals_petitions).

## **Lecture Recordings, Copyright, and Privacy**

As the recording and reuse of lectures in this course raise some particularly thorny privacy and property right issues, it is important to articulate the regulations that govern these recordings and indicate the way in which you can ask questions during the lecture but also maintain your anonymity.

First, on the use of the recorded lecture, the following applies:

This course, including your participation, will be recorded on video and will be available to students in the course for viewing remotely and after each session. Course videos and materials belong to your instructor and the University of Toronto and are protected by copyright. Do not download, copy, or share any course or student materials or videos without the explicit permission of the instructor.

Second, on your participation, the following applies:

For those of you who may wish to ask a question during the lecture but also wish to remain anonymous, you can do so by clicking on the three little dots next to my name in the list of attendees, type out your question, and hit send. I will know who sent the message but you will otherwise remain anonymous. If it is of general interest, I will share the question and answer with the class but with no attribution.

## **Readings**

At present, all libraries on the St. George campus are closed. They may open before or during term but, then again, they may not. That is the bad news. The good news is that

all required reading in books (now including Hatton and Williamson, *Global Migration and the World Economy*), in journals, and in working papers, are available online. This means that you will have no difficulty accessing these materials from the comfort of your home. To facilitate this access, all URLs (where available) are included on the Syllabus and I have also included a link to all these materials through the course web site in Quercus under Library Course Reserve.

Although there is no textbook for the course, some of you may wish to purchase the following two books:

1. **C.H. Feinstein, P. Temin, and G. Toniolo, *The World Economy Between the World Wars* (Oxford, 2008)**

2. **B. Eichengreen, *Globalizing Capital: A History of the International Monetary System, Second Edition* (Princeton, 2008)**

(The content of these books is also available online – see the Syllabus for the URL link.)

A limited number of copies are available in the University of Toronto Bookstore.

Abbreviation	Full Title
EHR	Economic History Review
JEH	Journal of Economic History
EEH	Explorations in Economic History
EREH	European Review of Economic History

The following

abbreviations (with their full titles) are used in the readings:

## **TOPICS AND READINGS [Please note that lecture dates are indicated in bold next to the topic headings.]**

### THE ESSAYS

Essays should be no longer **than five** double spaced pages (roughly 1500 words). The general idea is to choose a topic and define it sufficiently well that you can treat it seriously within the prescribed space. Suggested topics are broad and thus require considerable narrowing and refinement. Readings included in the course syllabus will provide you with a sufficient set of references for your essay but feel free to add material as necessary.

Copies of your essays should be submitted digitally through the course web site before midnight of the due date.

### Penalties for Late Submission of Essays

Some of you, alas, will end up submitting your essays after the due date. The penalty for late submission is 1 percentage point per day. The very last day that late submissions will be accepted is the last day of fall term classes, that is, December 9.

Extensions may be granted for medical reasons if it can be demonstrated that the illness or injury prevented you from completing the essay on time. To obtain an extension, you must submit a Verification of Student Illness or Injury form available at:

<http://www.illnessverification.utoronto.ca/getattachment/index/Verification-of-Illness-or-Injury-form-Jan-22-2013.pdf.aspx>

Only an original form, not a scan, an e-mail, or a copy, will be accepted. The form must be completed by a qualified medical doctor (or nurse practitioner), and the doctor's OHIP registration number must be provided.

#### SUGGESTED TOPICS

##### ESSAY 1. DUE OCTOBER 2, 2020

1. Emigration, good or bad – and from whose point of view? Discuss with respect to the experience of one sending or receiving country (or one or more groups within these countries) during the period of mass migration, 1870-1914.
2. It is often argued that the pre-WW I gold standard facilitated international trade and foreign investment. Did it? If so, how; if not, why not?
3. Did the expansion of international trade 1870-1914 foster convergence in the Atlantic community? Explain why it did or did not and support your argument with qualitative and/or quantitative evidence.

##### Essay 2. DUE NOVEMBER 6, 2020

1. Did the flu pandemic of 1918-1920 have a positive, negative, or no impact on subsequent economic growth and productivity? What factor or factors, if any, determined its impact? It is recommended that you focus on the experience of a single country.
2. What caused the post-WW 1 hyperinflation in Germany? Could it have been avoided and if so how? And, of course, if your answer to previous question is yes, why were the necessary anti-inflationary policies not introduced?
3. Was Britain's relatively poor economic performance in the 1920s simply the consequence of an overvalued exchange rate?
4. What happened to inter-allied war debts in the 1920s and 1930s, why, and did it matter?

##### ESSAY 3. DUE DECEMBER 4, 2020

1. Banking reform in the U.S. in the 1930s – success or failure?
2. What role, if any, did the Great Depression play in the rise of right-wing nationalist parties? Focus on the experience of one country.
3. Could the Great Depression have been predicted and its severity thereby reduced? Explain.

[If you choose to do this essay, CONSULT: Robin Greenwood, Samuel Hanson, Andrei Sheifer, and Jakob Sorensen, "Predictable Financial Crises", NBER, *Working Paper* 27396 (June 2020) AND ME.]

<https://www-nber-org.myaccess.library.utoronto.ca/papers/w27396.pdf>

4. What role, if any, did the financial crisis play in the length and severity of the Great Depression? Again, it is recommended that you focus on the experience of a single country.
5. Explain the nature and timing of recovery from the Great Depression in one of the following countries: the U.S., Germany, Great Britain.

#### GRADING SCHEME FOR THE ESSAYS

- Clarity of question and motivation 20%
- Statement of findings 5%
- Literature review 20%
- Clarity, coherence, completeness of analysis 25%
- Use of qualitative or quantitative evidence 20%
- Clarity and completeness of conclusion 10%
